

Your workplace according to your wishes

Manual workstation

We would be happy to put together a manual workstation for your welding task consisting of a welding control, welding head and other required components.

PERFORMANCE

Our manual workstations guarantee you a safe and trouble-free welding process. The flexible systems can be individually configured according to your wishes and needs.

CHARACTERISTICS

- Welding control from Harms & Wende, tailored to your welding task (AC / MF / HF)
- Our manual workstations can be configured with different dimensions and depending on the work activity (sitting or standing).
- Numerous other options, such as: individually adapted electrodes, secondary cables, cooling devices, pneumatic elements
... and much more

INCLUDING

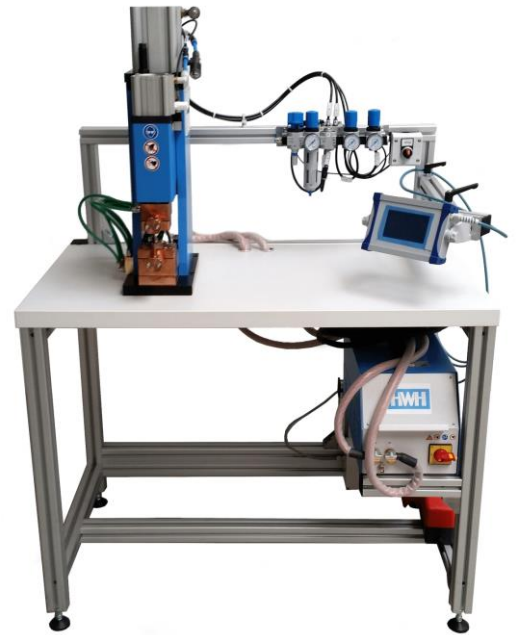

- Metal information boards
- Container holder for storage boxes
- Power supply 230V
- Workplace lighting from above

ADDITIONAL OPTIONS

- option for wheels or a feet
- Operation via footswitch or two-hand control panel
- Storage boxes
- Protective pad for tabletop
- Pneumatic unit (hardware-specific)
- Touch PC with Vesa mount (technical data on request)
- Cooling device (pressweless, 230V)
- PQS monitoring (PC required)

DIMENSIONS

- Depth: 750 mm
- Width: variable (1,200 mm // 1,500 mm)
- Working height: variable (780 mm // 1,040 mm)
- Height: variable (max. 2,100 mm)

What do I need for welding?
